

LOGIC PAD

Pack 1 · Thirty-five grid logic puzzles

From a gentle warm-up to properly hard. Every puzzle has exactly one answer. The answers are at the back.

1-5	Warm-up	● ○ ○	3 groups of 4
6-12	Easy	● ○ ○	4 groups of 4
13-20	Medium	● ● ○	4 groups of 4
21-28	Tricky	● ● ○	4 groups of 5
29-35	Hard	● ● ●	4 groups of 5

HOW TO PLAY

Each puzzle is a short story. A few people each have one thing from every group, and no two people share a thing. The clues tell you just enough to work out who has what.

- **Use the grid.** Each small box compares two groups. Put a **X** where two things cannot go together. Put a **✓** (or a dot) where they must.
- **One ✓ per row and column.** In each small box, every row and every column has exactly one **✓**. When you place a **✓**, cross out the rest of its row and column in that box.
- **Write your answer** in the table beside the grid (or under it), then check it against the answers at the back.
- **Carry facts across.** If Ari got off at Newtown, and Ari was not holding the mocha, then the Newtown rider was not holding the mocha either.
- **"Either ... or ..."** means exactly one of the two is true.
- **"Of A and B, one ... and the other ..."** means A and B are two different people, and the two facts belong to them in some order.
- **"Earlier than" or "more than"** says nothing about by how much. **"Exactly 10 minutes after"** does.
- **Stuck?** Go back to the clues you have not used yet. Each clue is needed. Nothing is there just to fill space.

Check an answer by scanning the QR code at the top of its page. The full rules and a worked example, solved step by step, are at logicpad.gethryn.com/how-to.html.
